Dear Mr. Hazen,

In your E-Mail of July 8, 2008, you asked us to confirm how the Agency's May 28, 2008 "Risk Mitigation for 10 Rodenticides" would affect four (4) of your Diphacinone products: 36029-17, 36029-20, 36029-23, and 36029-24.

The attached table lists these products and indicates if they are subject to the Final Rodenticide Risk Mitigation Decision and why it is subject to the Decision. 36029-20 is the only one subject to the Decision.

(See attached file: 36029-17,-20, -23, -24, Wilco,Sub to Rod Final Risk Mit Mea.doc)

Please contact me if you have any questions about this E-Mail and the attachment.

Thank You,

Daniel B. Peacock, Biologist

Hello Mr. Peacock,

Can you give me a better picture on how EPA-HQ-OPP-2006-0955 is going to effect 36029-17, 36029-20, 36029-23, and 36029-24? I don't believe 36029-17 and 36029-23 will be effected being Ag use baits? EPA-HQ-OPP-2006-0955 applies (if I understand correctly) to homeowner use bait equal too or less than a pound and labeled for indoor/outdoor use (as far as our labels are concerned). 36029-20 and 36029-24 are not considered to be "consumer use products" even though they are marked for=0 D homeowner use, they weigh more than a pound but not over 4, is not labeled for indoor use. Maybe I need to read EPA-HQ-OPP-2006-0955 again. Any and all information will be very helpful. Thank you for your time and have a great week.

Sincerely,

Blake Hazen
